Re: Application for EUROTOX recognition of courses

Dear National Register or Society,

EUROTOX has established a procedure to recognize courses as part of the comprehensive theoretical training for registration of toxicologists as European registered toxicologist ERT or continuing professional development (CPD) for the purpose of maintaining ERT registration. The aim of the recognition is to make it easier for individuals to find suitable courses. However national registers still decide whether the EUROTOX recognised course is recognised in the national recognition system.

Information on EUROTOX recognition of courses is available in Annex 2 to the ERT guideline <https://www.eurotox.com/ert/>

For the list of currently recognized courses see <https://www.eurotox.com/courses-for-ert/>

We now invite the national registers and societies to inform course providers in your country of the possibility to apply for recognition of courses.

Therefore, please forward this information to course providers in your country.

The application form is attached. Deadlines for application for recognition is March 1 and October 1, each year. Applications are sent to johanna.zilliacus@ki.se

We look forward receiving the applications.

Kind regards,

Johanna Zilliacus

On behalf of the Evaluation committee for EUROTOX course recognition
